Grades 1-8 Overbrook School offers ExtendedCARE Monday through Friday. Student to worker ratio averages 1:10. Students are supervised in three areas: the homework room, library and playground. Many students choose to do their homework immediately after school, but all students must go to the homework room an hour after signing into ExtendedCARE. Students are expected to work quietly while in the homework room and are encouraged to ask questions if they need assistance. While in the lower library students have access to various activities such as coloring, games and movies (G rated only). Students are also allowed to use the computers in the lower library. Games played on the computer or websites must first be approved an ExtendedCARE worker. The playground is available for free play.
